

# NASA Splash Down Café

---

## How do you use the market?

### *Methods of Payment*

- **Credit Card** – Mastercard, Visa and American Express are accepted.
- **Stored value key tag** – This is just like the bar-coded grocery store savings key tags that you probably already have on your keychain. We provide these free of charge. You can add value to the key tags using cash or credit. This quick and straight-forward process can be performed before or during purchases. Again, you can always add value to your key tag.

### *Kiosk User Quick Start*

- Pick out the items that you are interested in purchasing
- Scan your barcoded items.
- If you wish to purchase non-barcoded items, please choose the “No Scan” button and choose from the icons listed.
- Choose your method of payment.
  1. If prepaid market card, please choose “Prepaid Card” and scan your card. If you have insufficient funds for your purchase, please follow the kiosk instructions to complete the purchase.
  2. If Credit please choose this, and simply swipe your card.
- Please choose to receive a receipt or not.

## What are the advantages over traditional vending?

- Great products right in your break room available 24/7
- Fresh made deli type sandwiches, wraps and salads
- Market can carry a near limitless selection of food and Beverage options...not just what will fit in a machine
- No loss of money or “hung” products
- You can touch and feel the product before buying
- You can pay with your personal credit card

We look forward to providing you with more quality food and beverage choices than you have ever been offered.....right in your break room.
